

STANDARD GUILLOTINE KENNEL DOORS

1/4" HDPE Standard Panel
High Density Polyethylene (HDPE) panel that is machine routed along each side for a better air seal and to create less friction in side rails

Fastening Hole
Pre-drilled for easy cable attachment

Weather Seal Floor Cap
Flexible, metal reinforced trim with rubber bulb for complete weather seal at base of door

Mounting Slots
Generous adjustment slots measure: 1/4" wide x 7/8" long. This allows for proper fitting and alignment of side rails for smooth door operation.

Heavy Duty Dual-Channel Side Rails
Constructed with solid extruded 6063-T6 aluminum. Rails are heat treated and feature machined screw slots for easy mounting. Each rail measures 2.5" wide and 48" long. Dual-channel design allows for use with the Standard Security Boss 1/4" HDPE panel, or can be used with the Security Boss 1/2" Composite Insulated Panel.
